NASA hurricane study completes initial flights

A team of researchers participating in a NASA study completed its first research flights on Saturday for the Convection and Moisture Experiment (CAMEX) — a mission to gather data vital to improving hurricane modeling and prediction. Marshall Center's Robbie Hood is the CAMEX mission scientist. Information gathered allowed researchers to perform tests of instruments and communications systems.

Discovery set to land at 11:46 a.m. Wednesday at Kennedy Space Center, Fla.
